Delta Products Group

Petro Solutions

RidOIL Oil Emulsifier

Water/Oil Emulsifier that allows oils and water to mix for ultimate removal from a contaminated system. An oil cooler with a blown tube spills into the cooling tower or just a little water in your gas tank can BOTH be fixed. Just add **RidOIL** to combine the two and flush from the system for disposal.

PENETROL Restorer

Sludged Oil Remover for heat transfer fluids that have broken down and left deposits. When the oils in your lube system or hi-temp coolers need to be dissolved and flushed from their normal passages and replaced with new.

Delta BoilOUT

Retubing Boil-Out is used to remove the oils and greases found on newly replaced boiler tubes. These films must be completely removed in order for the boiler to produce any steam or clean hot water. Our **BoilOUT** is SAFER than most and can be added, heated and circulated with little or no dangers.

SUPER Penetrol

Carbonized Oil Cleaner can be circulated through the lube passages of your fouled system to remove the most stubborn oil deposits. For 'coked' or baked-on deposits that come from over-heating and oil breakdown and have gone beyond simple sludging. High temp heat transfer fluid deposit remover.

Delta DeGreaser

Citrus Cleaner/Degreaser just like the brand they use in your back room, but better. We formulate truly industrial strength products here and needed a great degreaser for use ourselves. We took the strongest, yet safest products and combined them to make a cleaner that actually works on the tough stuff.
